

Virtual Chief Strategy Officer

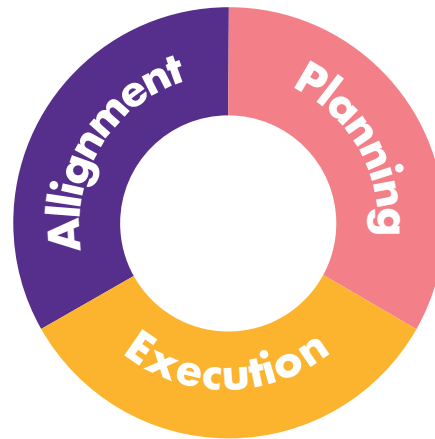

- Enhance operational efficiency
- Analyzing and pursuing strategic initiatives such as mergers, acquisitions
- Identify essential economic drivers and define key performance metrics
- Manage non-core business assets and streamline operations

Outsourcing strategic functions to a virtual Chief Strategy Officer (CStO) allows you to focus on core competencies and day-to-day operations. Leapfrog’s scalable cost model enables companies to allocate funds to corporate strategy as needed. We continually review the market landscape for relevant, attractive opportunities and take an inward-looking perspective to identify company gaps with fresh eyes.

Phases of Virtual Chief Strategy Officer Engagement:

Leapfrog dives deep into your company’s current operation, analyzes strategic growth opportunities, identifies operations that can be streamlined, moving your company toward its strategic objectives.

- Discovery and Alignment
- Development of Project Plan
- Execution of Project Plan (includes Value / Impact Tracking & Analysis)

Leapfrog jumps into action, quickly integrating into your company's existing structure, enabling you to adapt to changing market conditions, seize emerging opportunities, and stay ahead of the competition.

With 25 years of MSP, MSSP, CyberRisk Management, and now virtual CxO services, Leapfrog helps a broad array of companies simplify their IT operations while improving their resiliency and operations.
