Virtual Chief Technology & Information Officer

- Tailored to align with your financial, operational, and cultural requirements
- Maximize existing technology investments, lower costs, and reduce duplication of software tools/services
- Ongoing monitoring, maintenance, and accountability across all technology service providers

Outsourcing your Chief Technology Officer (CTO) and Chief Information Officer (CIO) allows you to enhance your technological capabilities and stay competitive in today's rapidly evolving digital landscape. Leapfrog collaborates with you to assess your current landscape, devise a strategic roadmap, and deliver the necessary solutions to meet both short-term and long-term goals.

We work with you to evaluate your existing technology state while framing out a roadmap, and then provide the technology needed to help you meet your business growth objectives. We also provide vendor procurement & sourcing services, focused on financial and operational goals plus your company's culture to ensure it's a good fit. Lastly, we'll utilize metric driven dashboard tools to continually monitor, maintain and hold accountable all of your technology service providers.

F Financial
O Operations
C Compliance
U Users
S Strategy

Our approach is to assess how technology impacts Finance, Operations, Compliance, Users, and Strategy (F.O.C.U.S). This assessment identifies the current state for each category below and actionable items to execute where necessary.

With 25 years of MSP, MSSP, CyberRisk Management, and now virtual CxO services, Leapfrog helps a broad array of companies simplify their IT operations while improving their resiliency and operations.

If you're ready for a partner to enhance your information technology strategy, **Leapfrog is ready to help. Contact us: VCXO@LeapfrogServices.com**
